Harlan J. Berk, Ltd. has presented an innovation in numismatics for some time now. The system is simple. When you want a coin in the sale, just bid the estimated price by phone or mail. We will send you the coin immediately. No waiting for the closing of the sale. Any and all coins not sold before the closing date will be sent to the highest bidder on February 19, 1987.

EXAMPLE — You bid estimate on a coin valued at \$100.00 and if your bid is the 1st to reach us, you will receive the coin immediately. If on the other hand, you bid \$75.00 on the same coin and are still the high bidder at the end of the sale, the coin will be mailed to you on the closing date, February 19, 1987.

If you are ever in the area, stop in and see us! We are only five minutes from Interstate I-55 or I-80. Of course, it's best to call first.

The following lots of Macedonia represent not only a large selection of the coins of Philip and Alexander, but also many rare and rarely seen archaic fractions. Many of the archaic fractional coins, because they are small, tend to have crystalized surfaces; — But in most cases, this is a normal condition for

these small, old planchets, and in fact this group of coins is in much nicer condition than usual for these rare coins.

Lots 173-177 and 186-198 represent the first time that a large group of Croesus coins of his reign have been found mixed with other contemporary Greek silver. The Mysian coins were copied from the lion protome on the Croesus coins. To reiterate, the coins of Croesus in this listing were all struck in his lifetime and not under the Persians. Many of the small denominations are known nowhere except from this very small find. Therefore, this may well be one's only opportunity to obtain a coin of Croesus of less than the siglos weight.

COLOSSAL ROMAN LIMESTONE TOGATUS

Imperial to Julio-Claudian 50 BC.-50 AD.

Our Funerary Togatus was made during the most interesting and best known period of Roman history from the Civil War between Pompey the Great and Julius Caesar to the time of Claudius.

Other than a break at the neck this Togatus has no damage or restoration. Sculptures of antiquity from 17th to 19th Century English and European collections are commonly over restored, even recarved to suit the taste of the times. After this they were placed in outdoor gardens where they weathered. This piece has suffered no such fate.

Height 6'10½"
Weight 1785 lbs.
